The need for Assessment of Health Apps

Agenda

- 1) Health app overload?
- 2) A guide to health apps
- 3) Why? -The value of health apps
- 4) National and international experiences
- 5) Model of assessment
- 6) Possible criterias in Denmark?
- 7) Next steps

Health App Overload?

325,000 mHEALTH APPS AVAILABLE – GOOGLE PLAY STORE IS NOW NUMBER ONE FOR HEALTHCARE APPS, OVERTAKING APPLE APP STORE

Number of mHealth apps displayed in App Stores

Health App Overload?

- Questionable **quality**
- **Poor control** regarding use (or misuse) of collected health **data**
- **Poor control** regarding **safety** and **accuracy**
- What to choose?

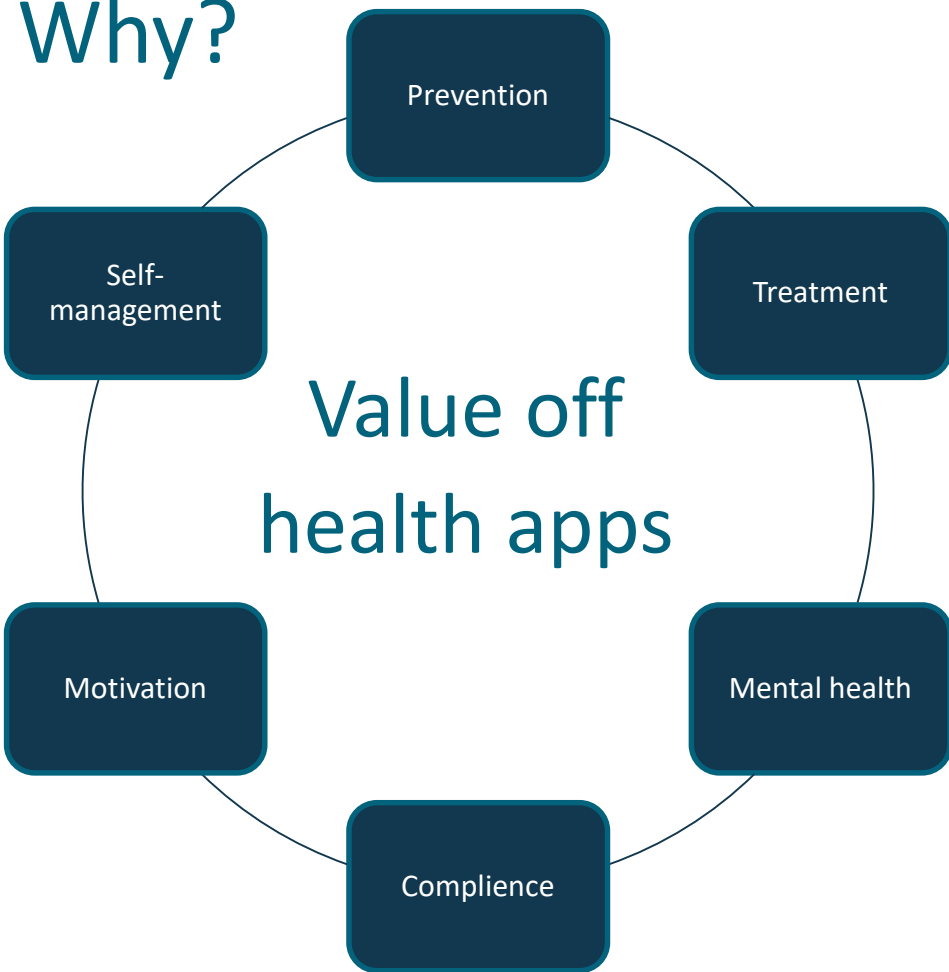

A Guide to Health Apps

*“The **technical, organisational and legal prerequisites** and possibilities must be analysed to establish a comprehensive **guide to e-health apps** that can viewed by both users and healthcare professionals. The analysis must draw on existing lessons learnt in Denmark and abroad.”*

Why?

National and International Experiences

Mindapps
Danmark

NHS Apps Library
England

AppSalut
Spanien

Model of Assessment

Health **apps** can give **valuable insights** in the **treatment** and **monitoring** of numerous diseases

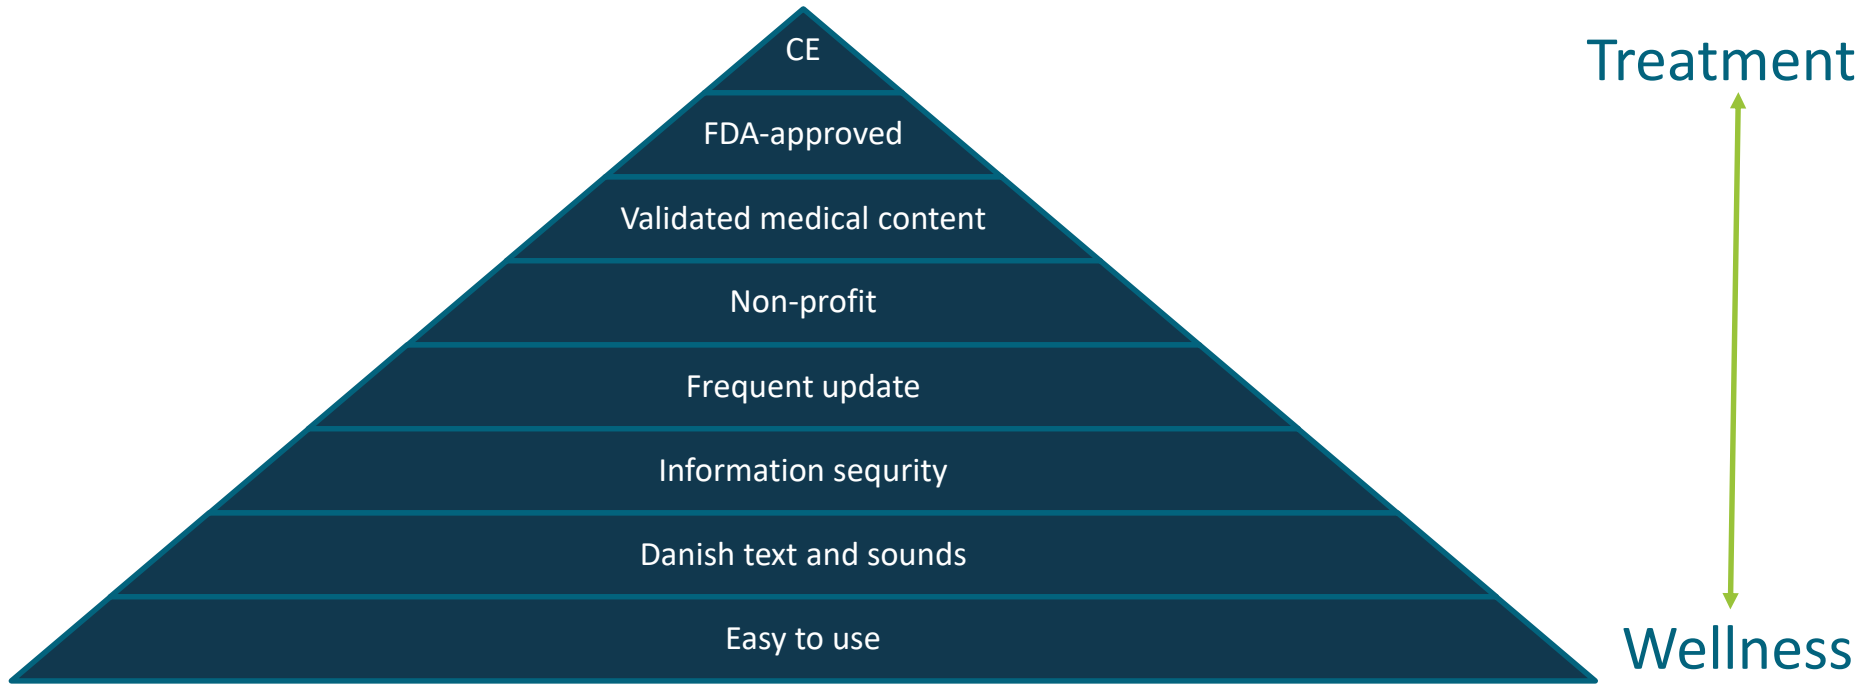

but if a health care **professional** and patients are to **recommend** and rely on a health app - we need to be **certain** that it is **safe**, **reliable** and **easy** to use

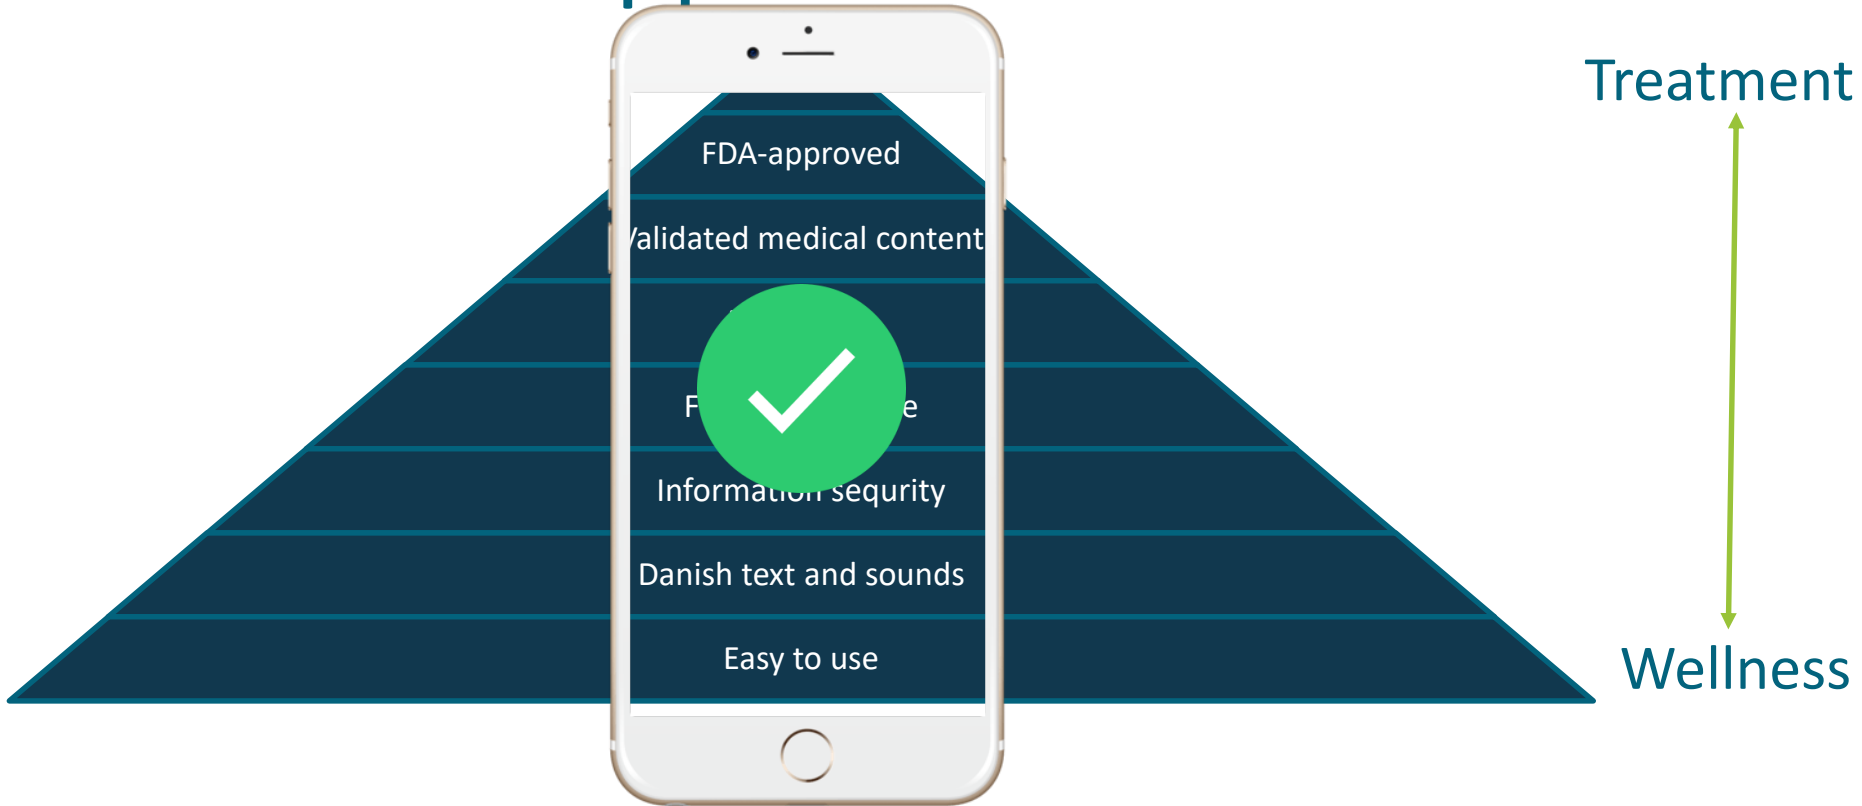

Possible Criterias in Denmark?

Not an easy task – maybe there is an app for this?

There's an app for everything!

Wellness

Self-management

Diagnosis/Treatment

Rehabilitation

”My Health”: There is *one* app for that!

”My Health”: There is *one* app for that!

- Video consultations
- Overview on my appointments
- Overview on my health data
- And much more...
