

Remarks on present national eHealth topics and Nordic collaboration in eHealth

PRESENTATION BY KENNETH AHRENSBERG, DANISH HEALTH DATA AUTHORITY AND CHAIR OF
THE NORDIC E-HEALTH GROUP

From past to present, 23 years with strategies

Tidligere strategier

- ◆ 1995: IT-politisk handlingsplan
 - MedCom
 - Elektroniske Patientjournaler
- ◆ 1996: Handlingsplan for elektronisk patientjournal (HEP)
 - Målrettede initiativer – central tilskud
- ◆ 1999 National IT-strategi for sygehusvæsenet 2000

Key numbers

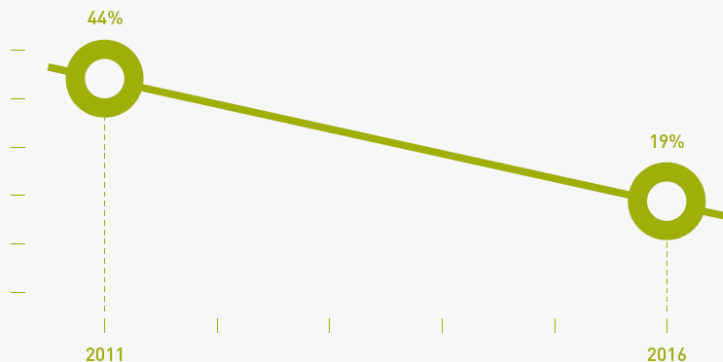

A change in hospitalisation and technology

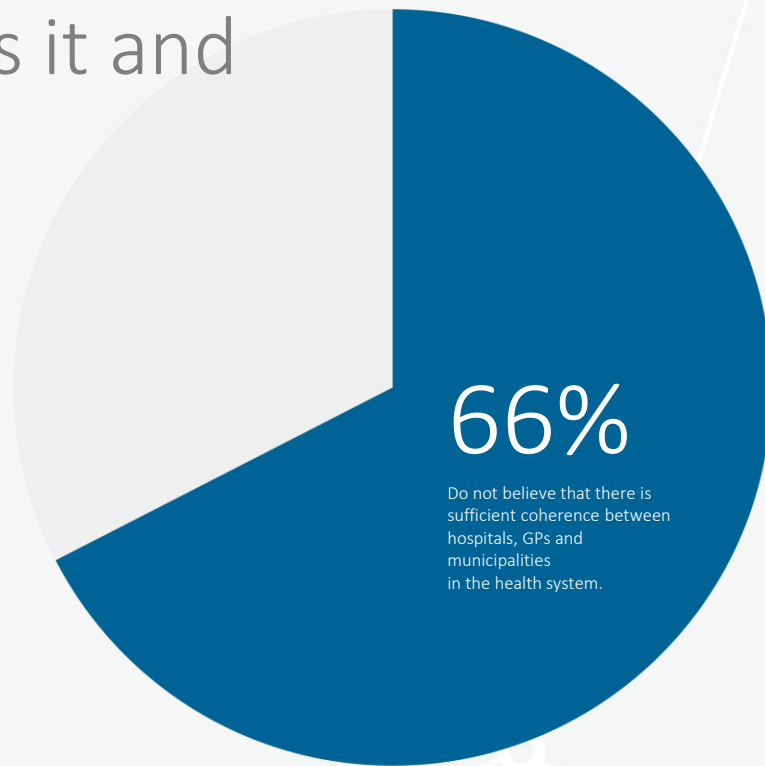

Because the Danes expects it and wants it

The elderly are rapidly becoming experienced online users

In 2011, 44% of persons aged 65 to 89 never used the internet. By 2016, this percentage had decreased to 19%. Thereby, the number of non-users was more than halved in five years.

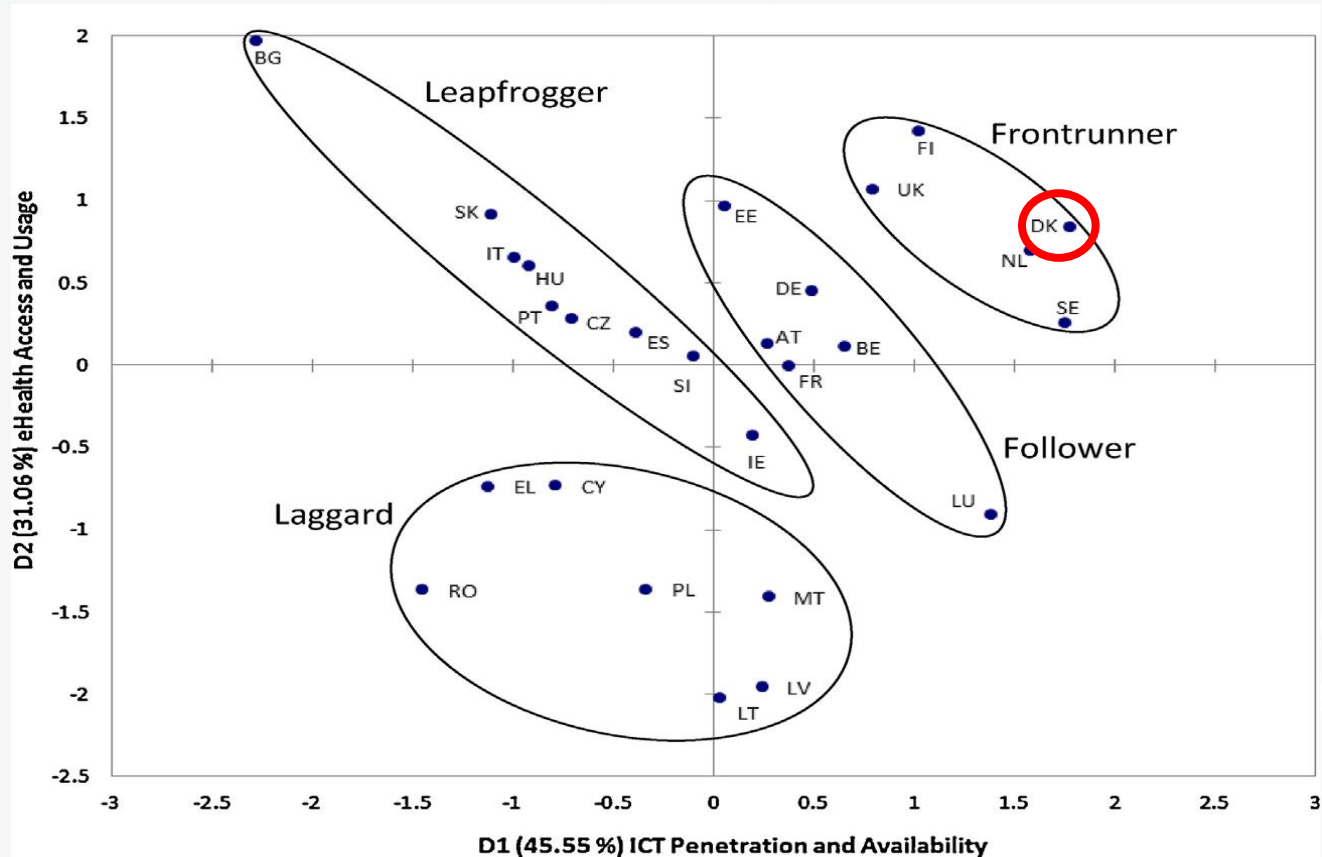

Source: Statistics Denmark, 2016

Source: In a 2015 survey conducted by Trygfonden and Mandag Morgen among Danish respondents, almost two-thirds responded that there is inadequate coherence between the various segments of the health system. In the same survey, respondents cite better coherence as the most important key feature of an improved health system. Only 25% expect cooperation between the hospital and the municipal health service to function satisfactorily to a great or very great degree.

WE ARE DOING ALRIGHT, BUT

Currie, Wendy L and Jonathan J. M. Seddon; A cross-national analysis of eHealth in the European Union: Some policy and research directions

8 NATIONAL GOALS – A SHARED HIGH STANDARD

Better coherence, higher quality and greater geographical equality in the provision of health services

Better, coherent patient pathways

A stronger focus on the chronically ill and the elderly patients

Improved survival rates and patient safety

High-quality treatment

Rapid diagnosis and treatment

Enhanced patient involvement

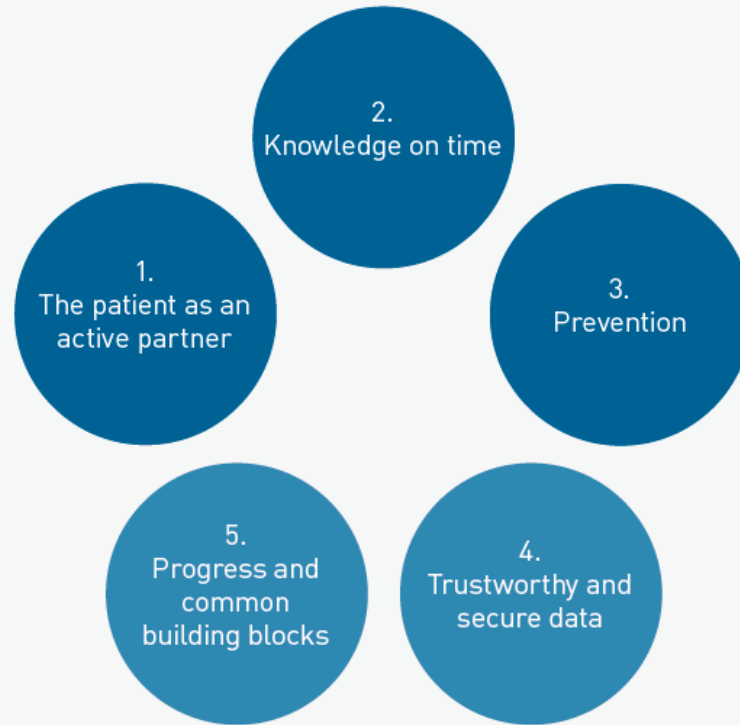

A greater number of healthy years of life

A more efficient health service

THE FIVE FOCUS AREAS OF THE STRATEGY

CYBERSECURITY IS A HOT TOPIC

The indicator work

- A set of indicators to
- Looking at the national
- At present looking at relation to indicators
- Christian Nøhr is at pr

eHealth standardization in the Nordic countries

- What are the policy instruments used to setting standards and securing adherence to standardization at a strategic level?
- How does the countries organize their normative role (e.g. Standardization bodies, Architectural governance, etc.)?
- Which international standards are chosen within the countries' national eHealth strategies and what are the experiences with these?
- Which international information models and architectural models are chosen within the countries' national eHealth strategies and what are the experiences with these?
- What role can standardization play with regards to improving conditions for vendors, speeding up innovation and enabling a Nordic eHealth market?
